

Monthly Running Costs

Top Tennis platform — infrastructure & third-party services

Prepared July 2026
Market: United States (+1)
Figures in USD

Planning estimates, not quotes. Prices are USD as of July 2026 and change frequently. The dominant costs are **volume-driven** (OTP verifications, calls, compute) — the actual bill tracks active users and match volume, not headcount. App store fees are fixed annual costs and are listed separately, outside the monthly totals.

At a glance

Stage	Monthly users	Matches / mo	Est. monthly cost
Pilot — MVP / soft launch	~100	~400	\$45 – \$250
Growth	~300	~1,200	\$430 – \$630
Scale	~500	~2,000	\$2,400 – \$4,100

Plus fixed annual: **Apple Developer** \$99/yr (~\$8.25/mo) and **Google Play Console** \$25 one-time.

What Top Tennis runs on

Component	Technology	Billing driver
Backend + database	Supabase (Postgres + Edge Functions)	\$25/mo Pro → compute add-ons
Real-time (chat & feeds)	Supabase Realtime + Socket.io	Bundled with Supabase Pro
OTP auth	Twilio Verify (WhatsApp channel)	Per verification (~\$0.05)
WhatsApp support	Twilio WhatsApp Business API + Claude Haiku AI	Per conversation + tokens
Voice & video calls	LiveKit Cloud	Per participant-minute
Media storage + CDN	Supabase Storage (100 GB w/ Pro)	\$0.021/GB over included limit
Push notifications	Expo Push	No per-message charge
Weather forecast	Open-Meteo	No API key; no usage charge
Marketing website	Vercel Pro	\$20/mo flat
Support microservice	fly.io (Node.js / Express)	Compute hours (scales to zero)
Mobile app builds	Expo EAS Individual → Production	\$29/mo pilot → \$99/mo growth+

Detailed breakdown by stage

PILOT ~100 users · ~400 matches/mo

Line item	Provider / plan	Cost/mo
Backend + DB + realtime + 100 GB storage	Supabase Pro	\$25
Support microservice (Shared CPU, 256 MB)	fly.io Pay-as-you-go	\$2 – \$5
Twilio OTP (~100–1,500 verifications, WhatsApp)	Twilio Verify	\$5 – \$75
WhatsApp support conversations	Meta + Twilio Business API	\$5 – \$30
SMS fallback (OTP)	Twilio SMS	\$1 – \$25
Voice & video calls (~5–50 calls × 5 min)	LiveKit Cloud	\$1 – \$20
AI triage — Claude Haiku	Anthropic API	\$1 – \$5
Mobile builds + OTA updates	Expo EAS Individual	\$29
Website + monitoring	Vercel Pro + Sentry Developer	\$20 – \$52
Apple Developer (amortized)	\$99/yr	\$8
Subtotal		~\$45 – \$250

GROWTH ~300 users · ~1,200 matches/mo

Line item	Cost/mo
Backend + managed DB + realtime (Supabase Pro + compute add-on)	\$25 – \$50
fly.io support microservice (dedicated, Shared CPU)	\$10 – \$20
Media storage + CDN (overages beyond Pro 100 GB)	\$10 – \$30
Twilio OTP (~5k verifications)	\$150 – \$250
WhatsApp support conversations	\$50 – \$100
SMS fallback	\$20 – \$40
Voice & video calls (~500 calls × 5 min × 2 participants)	\$30 – \$60
AI triage — Claude Haiku (~5k support sessions)	\$3 – \$5
Website (Vercel Pro) + monitoring (Sentry Team)	\$25 – \$52
Mobile builds + OTA updates (Expo EAS Production)	\$99

Line item	Cost/mo
Apple Developer (amortized)	\$8
Subtotal	~\$430 – \$630

SCALE ~500 users · ~2k matches/mo

Line item	Cost/mo
Backend + managed DB (Supabase Pro + compute & egress add-ons)	\$100 – \$250
fly.io support microservice (2 instances)	\$20 – \$40
Media storage + CDN (high-volume egress)	\$50 – \$150
Twilio OTP (~50k verifications)	\$1,500 – \$2,500
WhatsApp support conversations	\$300 – \$500
SMS fallback	\$150 – \$250
Voice & video calls (~5k calls × 5 min × 2 participants)	\$200 – \$350
AI triage — Claude Haiku (~50k support sessions)	\$20 – \$40
Website + edge + monitoring / logging	\$50 – \$100
Mobile builds + OTA updates (Expo EAS Production)	\$99
Apple Developer (amortized)	\$8
Subtotal	~\$2,400 – \$4,100

The two costs that dominate at scale

1 • OTP verification (Twilio)

Twilio Verify charges ~**\$0.05 per verification** on top of the message delivery cost — at 50k verifications/mo that is ~\$2,500 alone.

Mitigation — already in the codebase. The `send-whatsapp-otp` edge function sends via the WhatsApp authentication template ($\approx$ \$0.01–0.03 in the US), skipping Twilio Verify's per-verification premium. Combined with long Supabase Auth sessions and routing through WhatsApp before SMS fallback, this can cut the line by **50–70%** at scale.

2 • Voice & video calls (LiveKit)

LiveKit Cloud bills per participant-minute. At scale, 5k calls $\times$ 5 min $\times$ 2 participants = 50k participant-minutes/mo. Mitigation: route to audio-only when video is not needed (3 $\times$ cheaper per minute). For sustained high call volume, self-hosting LiveKit on a \$6/mo VPS eliminates per-minute charges entirely — only the `LIVEKIT_URL` environment variable needs updating.

Not monthly infrastructure

Item	Nature	Notes
Apple Developer Program	\$99 / year	Required to ship on iOS. Included in stage estimates as \$8.25/mo amortized.
Google Play Console	\$25 one-time	Per developer account.
Domain registration	~\$12–20 / year	—

How to keep the bill down

1.

Use the WhatsApp OTP channel

(

send-
whatsapp-
otp

)

instead of Twilio Verify's premium service — pay only the per-message send cost (~\$0.01–0.03), not the \$0.05 verification surcharge. At 50k/mo this saves ~\$2,000.
2.

Delay Expo EAS Production.

The Individual plan (\$29/mo) handles 30 builds/month and covers most of the Pilot stage. Only upgrade to Production (\$99/mo) when you are shipping urgent hotfixes multiple times a week.
3.

Prefer WhatsApp for support

— user-initiated support conversations are priced at Meta's lower business-messaging rate; only Twilio's small per-message fee applies on top.
4.

Let Claude Haiku deflect support volume.

At \$0.80/1M input tokens the AI cost is negligible against the Twilio messaging cost it prevents. Every AI-resolved query is one fewer live conversation charged.
5.

Self-host LiveKit

when call volume grows — a \$6/mo VPS eliminates per-minute charges entirely. The existing

livekit-
token

edge function only needs its

LIVEKIT_URL

updated; no code changes required.

Figures are directional estimates for budgeting. Confirm live pricing with each provider (Twilio, Supabase, Anthropic, LiveKit, Vercel, Expo, fly.io) for the United States market before committing.
